vehicles	A mode of transport to help a person travel from one place to another.
engine	Are used to power most vehicles today.
United Kingdom	Where we live, This is made up of four countries (England, Wales, Scotland and Northern Ireland)
astronaut	A person who is trained to travel in a spacecraft.

Knowledge

New Knowledge:

- Explore different types of transport.
- Sort modes of transport into land, sea, and sky.
- Look at why people use different modes to get to different places and different distances.
- Learn about the different parts of a road and learn how to cross a road safely.
- Create maps and begin to understand the purpose of maps and why we use them.
- Design boats that float.

The **United Kingdom** is made up of **England, Scotland, Wales and Northern Ireland.**

Fun Facts:

The moon used to be part of earth.
 Earth is covered in 71% water.
 There is a volcano on Mars that is three times the size of Everest.
 You couldn't walk on Jupiter, Saturn, Uranus or Neptune because they have no solid surface!

There are lots of different forms of **transport** and **vehicles**.
 Different vehicles are used for different jobs, eg. diggers, trucks, refuse lorries, tractors.

Some vehicles travel on the **road** – cars, motorbikes, lorries, trucks, vans, ambulances, fire-engines, bicycles
 Some travel in **water** – ships, boats, hovercraft, submarine.
 Some travel in the **sky** – aeroplanes, helicopters, hot-air balloons, rockets.
 Trains travel on **tracks**.

Space is a long, long way up into the sky. It is very dark in space with lots of stars.
 There are different **planets** in space, including the **Earth**, the **sun** and the **moon**.
 We live on the planet called Earth.

Astronauts travel to space in a rocket or space shuttle.
 Astronauts wear special space suits with helmets and gravity boots.
