

Year 1 Theme Knowledge Organiser: Penguins and Possums

There are seven continents and five seas.

The further the country is from the equator the colder it gets.

Animals are living things. They eat, drink and have feelings.
There are many different types of animals.

Key Vocabulary:

equator- it is an imaginary circle around the Earth. It divides the Earth into two equal parts

ocean- a huge body of salt water

season- there are 4 different seasons during the year with different types of weather

weather- the daily state of the atmosphere

continents- there are seven continents of the world. They are made up of countries. The continents are Asia, Europe, Africa, South America, North America, Australia and Antarctica.
